

Release Date: Immediate

Subject: Cupid Listening Post

Title: Kiosks in the Pink

Summary:

Black Cat completed a small scale project from a mix of customer outline and our standard Opus kiosk from start to installation in four weeks.

The listening posts are unique in that there is visual static element along with sound. We have also incorporated a simple sensor that activates sound on Approach "a good attract to any exhibit".

Finished in Shocking Pink the kiosks are certainly the most vibrant colour we have ever supplied.
