Title: Black Cat Designs Mobile Ticketing Kiosks

Summary:

Black Cat are pleased to work in partnership with Peachinc developing an innovative ticketing solution.

Our design engineers have produced prototype's of wall mounted kiosks that comes as a fixed and portable unit.

The Peach and Nectarine kiosk are at the forefront of a ticketing revolution that uses a computer generated graphical code sent to your mobile phone to receive and gain entry to events.

The patented graphical code is read in the kiosks enabling tickets to be printed or a gate or turnstile to be opened.
